Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2,5-7, 10,12-13 and 64-67 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Patel et al. or Bunce et al.

Patel et al. teach a device(10) that has ports(12) that permit fluid to the bottom of the device. There is a first piece of bibulous material(32),and a second piece of bibulous material(34) and a piece of liquid expandable material(22). When material(28) expands, materials(32) and (34) are in fluid contact with one another. Material(28) expands as a result of fluid through port mark(20). Material(28) has been read on the claimed "expandable collection member". Material(34) can contain a reagent for analysis of a reagent.

Bunce et al. teach many different configurations that read on the instant claims. Figure 4 is exemplary and teaches a liquid transfer device comprising a holding a portion (70d) having first and second ends, a retaining portion(32) attached to the holding portion, and expandable collection member(23d) having a first and second size and reagents(32d) to detect the analyte of interest.

Claims 1,3,7-8,10,12-13, 64-66 and 14-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schmitz(USP 3,713,775).

Schmitz teaches in figures 2-3 a pipette(51) having a first and second end. The interior of the pipette retains a sample and plunger(54) has been read on the claimed "expandable collection member" having a first and second size. The pipette tip(55) has been read on the claimed "discharge member" and place the sample in curette(36) containing reagents(210).

Claims 1-3,5-8,10,12-13,46-52 and 64-66 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shapiro(USP 4,750,373), Hydo(USP 4,036,064) or Magnussen et al.(USP 5,364,596).

These references teach sample collection means having a plunger with multiple positions and stops, which have been read on the claimed first, and second holding positions.

Allowable Subject Matter

Claims 4,9 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

No remarks addressing the rejection of record were filed with the 31/05 RCE filing.

Conclusion

This is a RCE of applicant's earlier Application No. 09997,023. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had

been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
